OUTDOOR PANELS

SECURITY AT HOME

Duox Plus Panels

SKYLINE, CITYLINE and MARINE: A different aesthetic for each project. **Push buttons panels** for individual residences, businesses or small buildings. **Digital panels** for medium and large projects, incorporating the extra graphic display with a 3,5" TFT, which facilitates its use and enhances the possibilities of the outdoor panel (integration of images and messages). The panels include wide-angle colour camera as standard with lighting for low-light vision conditions. In addition, they can integrate multiple systems: **Information, communication and access control** for more security in the property.

COMBINE DIFFERENT MODULES WITH INFINITE POSSIBILITIES

A modular panel that allows total freedom to configure any composition of components required to meet system specification. Panels made of anodised aluminium with high outdoor resistance.

A CLASSIC IN THE BUILDINGS OF OUR CITIES

Great ability to combine simplicity and effectiveness. Standardized or made to measure.

CITYLINE is designed for single block developments. Manufactured using a profile of anodized aluminium the CITYLINE panel offers robust resistance in demanding external environments.

CUSTOM THE MOST RESISTANT STAINLESS STEEL PANEL

The **MARINE** range of outdoor panels is vandal-proof and highly resistant to wear, even under extreme climate conditions. Made of AISI316L stainless steel, highly resistant to saline environments, 2.5 mm-thick. Standardized or made to measure.

Within the **MARINE** line, the exclusive **MARINE ELITE** panels allow total freedom of imagination and creativity: any colour, any size, any composition. And in the steel coloured panels, any laser-engraving.
