## BATTERY ADAPTOR 12 V

Reference

2060

EAN

8424299020600

### Description.

#### Description

It is used when emergency functions are required such as in the case of a power cut. A 12Vdc power supply is used with this adaptor and the necessary batteries to provide the necessary current and voltage for the system, (batteries not included with the adaptor). If the voltage falls below 11Vdc the battery automatically connects. This adaptor is compatible with any type of standard lead acid battery. They are mainly used in video door entry systems which use the Fermax MDS and Access Control Systems. Used when the facility requires an emergency function. It has a DIN 6 rail-mountable format to facilitate its installation on the interior of electrical panels, or alternatively it can be screwed directly onto the wall. It is constructed from VO self-extinguishing material.

#### Technical Details

- Input voltage: 12 Vdc
- Output voltage: 12 Vdc
- Output Current: depends on the batteries chosen.
- Battery: any 12V acid lead battery
- Operating Temperature: 0 ~ +50 °C / 32~122°F
