

Product Code

F05192

MARINE KEYPAD READER

Reference

5192

EAN

8424299051925

Description.

Description

MARINE is the Fermax IP54 IK09 vandal-proof panel. It is made of 2.5 mm thick stainless steel. Type AISI 316L steel.

Marine is the perfect choice for installation in places with extreme weather conditions or in hazardous environments, humid or corrosive climates.

This Marine plate includes the flush box. If a surface box is desired, it must be ordered separately. The surface box includes a protective visor.

Digital keypad allows the door to be opened by entering a 4 to 6 digit code previously programmed in the central controller, which is required for operation.

The wiegand keypads provide the access control installation with anti-sabotage security as they do not incorporate the door opening mechanism or the exit button connection. These functions are supported by the external controller. They can be used with door controllers using the Wiegand-8 or 4-bit burst protocols.

Centralised access control system. For installations requiring PC-based code switching or event logging. Requires an external centralised controller such as AC-MAX, AC-PLUS or IP AXES. Depending on the controller where this wiegand keypad is connected, it must be configured in 4 or 8 bits burst.
