Description.

Description

Induction loop amplification system (teleloop) module used in combination with VDS and DUOX audio and video amplifier modules (including open door indication vocal synthesis) to allow use by people wearing hearing aids (equipped with T selector). Connection to the amplifier module using multiple cable included.

The "OneToOne" module with inductive loop shows, using 4 LED icons, the state of the board.

These icons symbolize:

- Call
- Conversation
- Door Opening
- Busy channel.

In addition, each of the sounds and audio reproduced by the amplifier are emitted by the inductive loop to the devices of disabled people.
