

Product Code

FE01087

MDS/AC+ REMOTE MANAGEMENT TERMINAL

Reference

1087

EAN

8424299010878

Description.

Description

Remote Management IP Terminal enables connection between the PC and the installation through the Ethernet network and Internet to configure, control and manage the facilities remotely, avoiding additional wiring. The Remote management Terminal reconverts TCP/IP packets into serial data, so that the installation is able to interpret them in the same way as if it were directly connected to the PC.

MDS Digital system: Simplified BUS installation digital audio and video door entry system that lets you manage buildings and residential complexes of unlimited size and able to integrate all the community services:

- Audio and Video Door Entry Systems
- Intercommunication between accesses.
- Access Control
- Centralized and automated security

Requires Central Unit/s to manage the installation (Capacity per UC: 9999 homes, 32 accesses/guard units. Can link up to 63 UCs). Can be either general entrances or interior blocks.

MDS systems require floor Decoders to connect the homes to the installation BUS and act as insulators. Home-panel communication is private.

Wiring:

- Audio: 6-wire bus.
- Video: audio bus + Coaxial (video) + 2 power supply wires.

Maximum distance in the installation depending on the cable section used (see technical manuals).

Technical Details

Power supply 230 Vac by means of 12 Vdc adaptor included.Connection to the central unit by interface ref. 2466.Ethernet connection RJ49.Port RS-232 for direct link to PC.

Power supply:

- Audio: 12 Vdc
- Video: 18 Vdc
