THE E-MAGAZINE FOR SPECIALISTS ON VIDEO DOOR ENTRY SYSTEMS

Summer is here, Smile again!

16 juillet 2015

Because there are some period of the year is easier to smile, we want that period to be with us again.

This summer, you can find **the 7" Smile monitor** (ref.6550) and its **KIT version** (ref.5071) in all our Official Distributors.

You liked its design before, you will love it even more now: discover its **revamped aesthetic** with new white outline. **Pure and sleek.**

Smile is an **advanced hands-free monitor with high-performance features:**

- OSD menu with easy browsing through graphic icons. Simple and intuitive!
- With capacitive pushbuttons to activate the user functions on/off. Try it and feel the smoothness and agility!
- Surface or flush-mounted installation options (ask for accessories).
- Additional functions available such as call divert through the telephone interface or integration with CCTV.

The 7" Smile Kit is supplied with **all necessary material** for an individual residence installation:

- 7" Smile Monitor
- 1/W City VDS Door Entry Panel
- Power Supply

Additionally, depending on the characteristics of each home, the professional may recommend to final customers the incorporation of a **wide range of accessories to complete the installation.**

A 2nd door entry panel

The back door or the garage door can count on the additional service of a [video panel \(ref.48505\)](#) or [audio panel \(ref.48455\)](#).

With a monitor or up to two telephones in the home

A perfect choice in order to avoid that the stairs of the villa become a nightmare for the user. No need for additional power.

With additional functions

From the OSD menu, capacitive buttons of the monitor can activate different elements: Open or close the garage door or turn on the courtesy light when a visitor comes. Simply add a [relay activation \(ref.2013\)](#)

Forward the call to any landline- or mobile phone and be able to respond and open the door, wherever you are. You only need one [Telephone Interface \(ref.4545\)](#) in the installation.

Additional surveillance.

From the video door entry system, the pool, the garage or the desired point may be controlled, thanks to surveillance cameras connected to the monitor.
